9 WHY CHOOSE BRI

10 CONTACT US

BRI - MORE THAN JUST REBAR!

Established in 2007, Barnes Reinforcing Industries (BRI) is a leading supplier of reinforcing steel and related products, proudly serving the construction, mining, and infrastructure sectors across southern Africa. With state-of-the-art facilities and operations in Gauteng, KwaZulu-Natal (Izulu Reinforcing), and the Western Cape (Barnes Rebar Western Cape), we deliver nationally with local expertise.

PRECISION IN REINFORCING STEEL

Engineered to meet the highest standards of strength and compliance.

Barnes Reinforcing Industries (Pty) Ltd, known as BRI, is a proudly South African company and a key member of the Barnes Group. With a strong southern African footprint and decades of industry experience, BRI is a trusted supplier of reinforcing steel and associated wire and steel products.

Our operations are built on efficiency, reliability, and an unwavering commitment to quality. From major infrastructure projects to commercial developments and residential builds, BRI delivers reinforcing solutions that meet the demands of South Africa's growing construction and engineering sectors.

With dedicated regional operations in both the Western Cape (Barnes Reinforcing Western Cape - BRWC) and KwaZulu-Natal (Izulu Reinforcing), we offer our clients responsive, local service backed by the scale and strength of a national group.

Our offering goes far beyond just rebar. BRI provides a full-service solution — from supply and processing to delivery and on-site installation — backed by a skilled, dedicated project management team with a strong focus on quality, compliance, deadline-driven delivery, commercial accuracy, and customer satisfaction.

QUALITY ASSURANCE & ACCREDITATIONS

At Barnes Reinforcing Industries, quality, safety, and environmental responsibility are integral to everything we do. Our operations are underpinned by internationally recognised management systems, ensuring consistent product quality and service excellence.

These accreditations demonstrate our dedication to best practice, continuous improvement, and sustainable operations in the construction and reinforcing industry.

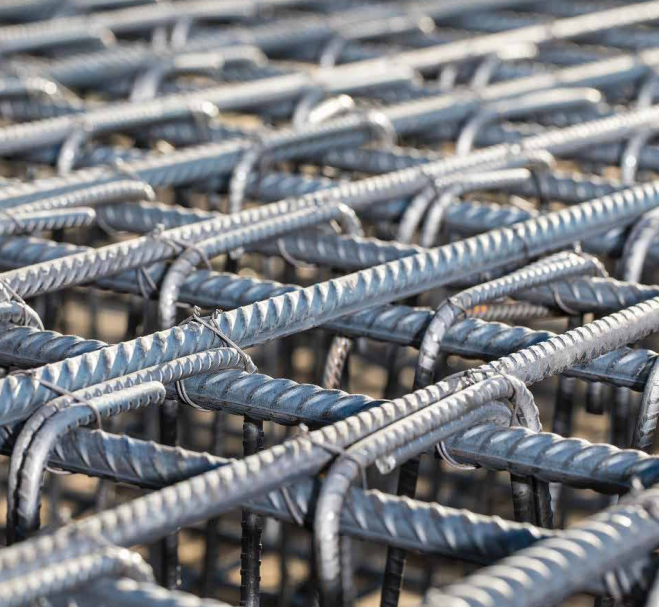

We are proud to be DEKRA accredited with ISO 9001:2015 – Quality Management Certification.

In addition, BRI is a Level 3 BBBEE Contributor, reflecting our commitment to transformation and inclusive economic growth in South Africa.

Strong foundations start with the right reinforcement. It's not just steel – it's the backbone of every build."

OUR SOLUTIONS

"Barnes Reinforcing Industries supplies high-quality reinforcing products and services to a wide range of sectors, including commercial and residential construction, civil infrastructure, mining, precast manufacturing, and industrial developments. From high-rise buildings and bridges to housing projects and concrete components, our solutions support the structural integrity of projects across South Africa's key industries."

OUR SERVICES

Reinforcing Steel (Rebar)

Rebar is essential to any reinforced concrete structure. We supply rebar in stock lengths or cut and bent to your project specifications. All material meets SANS 920:2011 Edition 2.3, and we also offer BS 4449 B500B grade with 500 MPa tensile strength.

All cut and bend work adheres to SANS 282:2011 Edition 6, ensuring reliable performance and full compliance.

Installation Service (Fixing)

Our experienced on-site teams offer complete fixing and installation services. We understand the pressure of modern construction timelines and contracting environments, which is why we work closely with you to deliver fast, efficient, and professional rebar fixing — allowing you to stay focused on the bigger picture.

Project Management

Every successful installation starts with smart planning. Our project managers coordinate the seamless flow of materials between factory and site, ensuring accuracy, timing, and consistency. On-site managers oversee installation to guarantee correct placement, quality control, and compliance with engineering standards.

More than just Rebar!

ASSOCIATED STEEL AND WIRE PRODUCTS

Reinforcing Mesh (Ref Mesh)

BRI manufactures and supplies welded mesh in both sheets and rolls, conforming to SANS 1024:2024 Edition 2.3. We also offer custom-cut and bent mesh to reduce site wastage and simplify installation.

Rebar Couplers

As the South African agent for internationally recognised Regbar mechanical rebar coupler systems, Barnes Reinforcing Industries provides a complete solution for the supply and installation of high-performance reinforcing bar couplers for the construction and infrastructure sectors. Backed by technical expertise and on-site support capabilities, BRI delivers reliable mechanical splicing solutions that improve structural integrity, reduce steel congestion, and simplify reinforcement continuity in demanding applications.

Steel Fibres

Steel fibres are precision-engineered reinforcement elements designed to improve the strength, toughness, and durability of concrete. By distributing reinforcement evenly throughout the mix, steel fibres provide superior crack control, impact resistance, and long-term structural performance.

Post-tensioning

Post-tensioning (PT) is an advanced concrete reinforcement system that improves the strength, durability, and performance of concrete structures. Widely used in commercial, residential, and industrial construction, PT systems provide efficient and economical solutions for parking structures, apartment developments, office buildings, hospitals, bridges, high-rise buildings, and underground construction. By enabling longer spans, wider openings, and the ability to support heavier loads with reduced material usage, post-tensioning delivers safe, cost-effective structural solutions for demanding construction environments.

ASSOCIATED STEEL AND WIRE PRODUCTS

Hard Drawn Wire

At Barnes Reinforcing Industries (BRI), we supply high-quality hard drawn wire engineered for strength, consistency, and reliable performance across demanding construction and industrial applications. Manufactured to stringent quality standards, our hard drawn wire solutions are ideal for reinforcing, mesh production, fencing, and general fabrication requirements, with dependable supply capabilities and technical expertise to support projects of all sizes throughout southern Africa.

Galvanised Wire

BRI stocks a wide range of black binding wire and galvanised wire for construction use. Binding wire is available in 1.6, 2.0, 2.5, and 3.15 mm diameters, and galvanised wire ranges from 1.6 mm to 4 mm. These are ideal for securing rebar, mesh, cover blocks, and other site applications.

Spacers and Cover Blocks

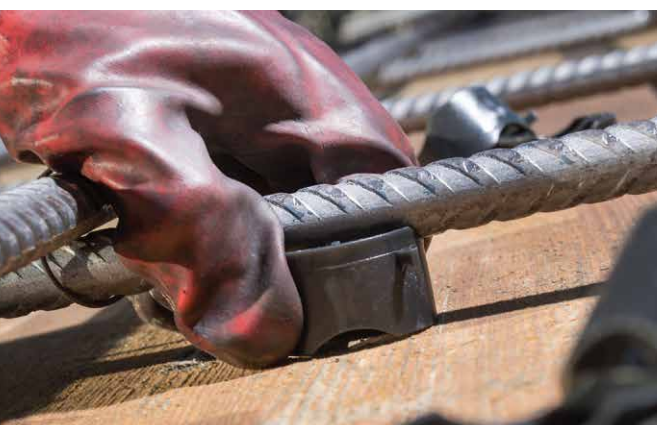

BRI supplies a complete range of concrete accessories to ensure correct concrete cover and structural performance:

- Concrete Spacers
- Chair Spacers / Cover Blocks
- Rebar Clips
- Rebar Safety Caps
- Wheel Spacers
- Centralisers

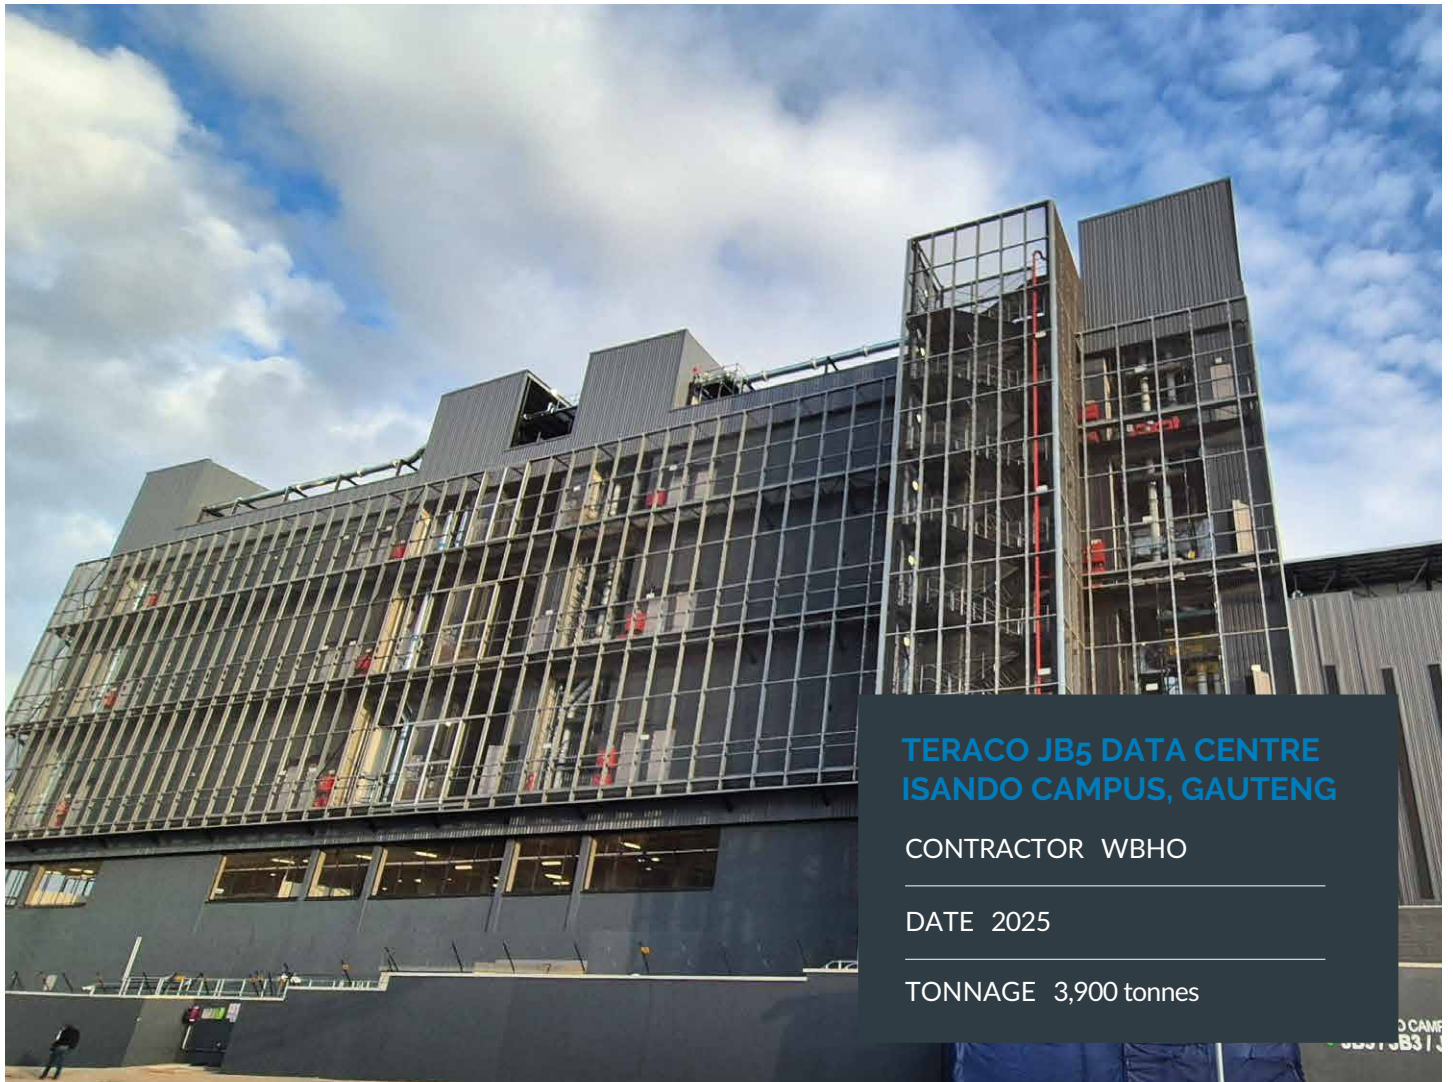

Construction Plastic

BRI offers a range of high-performance construction plastics used in reinforcement and waterproofing applications, including:

- Damp-Proof Course (DPC) for brick force
- Under Surface Bedding (USB) for mesh installations

BRI & REGBAR PARTNERSHIP

Bringing Global Reinforcing Innovation to Southern Africa

Through its strategic partnership with Regbar, Barnes Reinforcing Industries (BRI) brings world-class reinforcing solutions and technical expertise to the Southern African market. As the official representative of Regbar in the region, BRI provides clients with access to internationally recognised reinforcing technologies, specialised systems, and engineering support tailored to the demands of large-scale infrastructure, commercial, and industrial projects. The partnership combines Regbar's global innovation with BRI's established local industry knowledge, supply capability, and on-site support to deliver reliable, high-performance reinforcing solutions across Southern Africa.

WHY CHOOSE BRI?

- **Nationwide Capability:** Strategic branches in Gauteng, Western Cape, and KwaZulu-Natal
- **Proven Quality:** All products conform to local and international standards
- **Turnkey Service:** Reinforcing supply, installation and project management
- **Expert Support:** Technical guidance and project oversight
- **Efficient Delivery:** On-time and accurate fulfilment
- **Full Project Completion:** From delivery to documentation, we bring projects to a professional close.

OUR FOOTPRINT

With branches strategically located across South Africa, Barnes Reinforcing Industries has the footprint and logistical capability to efficiently service projects throughout Southern Africa. Our national network enables reliable supply, responsive service and consistent support for construction, infrastructure, mining, and industrial projects across the region.

BRANCH CONTACT DETAILS

GAUTENG HEAD OFFICE

PHYSICAL ADDRESS

3 Prevett Street, Spartan Ext 1, Kempton Park,
Johannesburg, Gauteng, South Africa
